PROFESSIONAL SUMMARY

B.Tech Computer Science (Data Science) graduate, now pursuing an MBA in Business Analytics, with hands-on experience building production-grade Power BI dashboards for a national government transit program and full-stack analytics platforms end to end. Skilled in Python, SQL, and DAX, with a track record of turning raw operational and public data into decisions for both ministry-level stakeholders and retail end users.

WORK EXPERIENCE

IT Intern, Data Analytics

National Capital Region Transport Corporation (NCRTC), Ghaziabad, India | Sep 2025 - Nov 2025

- Designed and deployed 4 Power BI MIS dashboards using advanced DAX measures to track real-time operational KPIs across the PM-eBus Sewa national fleet program, giving ministry-level stakeholders continuous visibility into fleet performance.
- Partnered directly with the Senior GM/IT to redesign MIS report layouts across all 4 dashboards, standardizing KPI presentation and making cross-team reporting easier to read and act on.
- Automated manual MIS reporting workflows with Excel macros and Power Query and optimized the underlying SQL queries, cutting dashboard generation time by 20-25% and reducing report refresh time by roughly 25%.
- Presented dashboard findings and KPI trends in biweekly reviews with a 5-6 person IT leadership team, translating technical metrics into plain-language insights for non-technical stakeholders.
- Coordinated across 3 stakeholder groups (IT, operations, and ministry liaisons) to gather requirements and validate KPI definitions before each of the 4 dashboard rollouts.

PROJECT EXPERIENCE

FundScope: Full-Stack Mutual Fund Analytics Platform | Next.js 15, Python, SQLite, AMFI API, yfinance
amol257.github.io/fundscope/

- Developed a full-stack mutual fund analytics platform with Next.js 15 and Python/SQLite, pulling live NAV, returns, and holdings data from the AMFI API and yfinance to power fund screening and comparison for retail investors.
- Engineered a Python scoring model using CAGR, Sharpe ratio, and Alpha metrics to rank 32 curated funds across 5 categories, applying statistical analysis to surface performance trends an average investor would miss.
- Designed interactive 3D visualization components and a unified motion/animation system across the platform, turning raw fund performance data into a polished, decision-ready analytics interface.
- Developed FundBot, a grounded AI assistant handling natural-language queries across 5 core categories (returns, risk, comparison, holdings, screening) to make fund data accessible without a finance background.

India AQI Dashboard: AI-Powered National Air Quality Tracker | React 19, TypeScript, Python, Gemini AI, Leaflet
amol257.github.io/aqi-dashboard/

- Architected a national air quality tracker aggregating live pollution data from 511 monitoring stations across 28 states, with daily, weekly, and monthly trend breakdowns.
- Created medical alert metrics built on the CPCB's 6-tier AQI severity scale (Good to Severe), translating raw readings into clear health-risk guidance for non-technical users.
- Integrated Gemini AI to generate hourly, contextual health-risk insights from raw sensor data, turning a dense public dataset into an actionable, easy-to-read tool.
- Implemented the interactive front end in React 19 and TypeScript with Leaflet maps for geospatial visualization, then deployed and debugged the production build on GitHub Pages.

CORE SKILLS

MIS & Reporting: MIS Reporting, MIS Automation, Reporting Automation, KPI Dashboards, Dashboard Development, Business Requirements Analysis

Visualization & Analysis: Power BI, DAX, Data Visualization, Data Storytelling, Trend Analysis, Ad-hoc Analysis

Programming & Databases: Python, SQL, MySQL, VBA, REST API

Data Analysis: EDA, Data Cleaning, Data Transformation, Statistical Analysis, Data-Driven Decision Making

MS Excel & Automation: Advanced Excel (VLOOKUP, XLOOKUP, INDEX-MATCH), Pivot Tables, Power Query, VBA Macros

AI & Cloud: Claude AI, Gemini AI, Microsoft Copilot, IBM Cloud

Collaboration: Stakeholder Management, Cross-functional Collaboration, Process Improvement

EDUCATION

MBA, Business Analytics Specialization

NMIMS CDOE, Mumbai, India | 2026 - Present

B.Tech, Computer Science (Data Science Specialization)

ABESIT, Ghaziabad, India (AKTU) | 2022 - 2026

CERTIFICATIONS

- Generative AI: Hack2Skill, in collaboration with Google Cloud (May 2025)
- Cloud Computing: IBM / PBEL Virtual Internship equivalent (Aug 2025)
- Excel Data Analysis: Udemy (2025)
